ABOUT US

Our Research was based on using the extract of the orchid flower, this Amazonian flower, known for its tolerance to harsh weather conditions and high temperatures, and that its extract is an alternative to refreshing and maintaining hair, so it is used in preparations that are used to care for hair, as it removes hair from the accumulated chemical substances that prevent it from growing and revitalising the hair's natural components Alpha keratin that builds upon the hair, causes it to become inactive and prevents it from growing. And it eliminates the fungi that infect the hair follicle.

The most important thing it helps to revive and revitalise the stem cells and regenerate them without using injection exactly as the plasma principle by absorbing it by the cells. Our AS invention worked well on Women's hair, in European and Arab countries, especially the Gulf and Saudi Arabia in particular, it revolutionised hair treatments and dealt with the problems caused by heat, moisture, and salty water on the hair, especially in these regions. The results were very tangible and not just theoretical.

EST. 2008

AHMAD SLIEMAN

founder & ceo

Lebanese international hair expert Ahmad Slieman, whose experience did not stop at providing the best solutions for treating hair problems through his therapeutic and hair care innovations, but rather changed the concepts of hair treatments for many women that may harm the hair and which some people mistakenly believe are beneficial. It did not stop at that, but AS HAIRCARE was considered a revolution in the world of hair care and treatment.

Hair Expert Ahmad Slieman founded AS hair care, he is one of two in The World that came up with this treatment . The origins of the invention are back to his father, after years of research, going back twenty years or more when the Brazilian Keratin Treatment was introduced to the market, it was discovered that it causes cancer after about six months because it contains formaldehyd.

MASTERCLASS AIMS AND GOALS

The Masterclass is designed for artists who wish to take their knowledge one step further and want to 'refine' their skills and update their techniques when it comes to treating hair-loss and advanced scalp treatments.
